Abstract. A refereed selection of proceedings papers will be published in a permanent conference website in Electronic form. In these guidelines we describe the format instructions and the submission procedure both to be followed seriously. The text of these guidelines is written in the prescribed format and can be used as a specimen.
Please note that if you don't like to submit a paper you only have to submit an Abstract by using the Electronic Submission Form from the Conference web site.
Keywords: Conference, CHAOS, Chaotic Modeling, CMSIM Style file.

1 The format of the text

Please use the `CMSIM.cls` style file and standard fonts. Use other style files only if it is absolutely necessary in order to typeset your text.

If you have any problems with our file format please contact the conference secretariat

2 Heading, abstract, keywords, and sections

An abstract (6–14 lines) is to be included after the heading using the commands `\begin{abstract}` ... `\end{abstract}`. Specify keywords using the `\keyword` command.

3 Length of the paper, figures, tables, and equations

The manuscripts should be from **8 - 14 pages** using the `CMSIM.cls` style file. Optimum size is 12 pages.

Each figure or table must have a caption, briefly explaining this figure or table, e.g., "Fig. 3. Plot of ... ." or "Table 1. Data of ... ." (arabic numbering). Use the `\ref` command when refering to a figure or a table in the text, for example: "Dealines are available in Table 1".

Figures and tables must be included at the appropriate place in the text. Please, provide the figures only using the pdf (prefered), jpeg or in eps format.

... ...	Abstract submission and special session submission
Notification to authors:	3 weeks after submission
....	Camera ready paper
....	Conference

Table 1. Deadlines and important dates

The `[width=.4\textwidth]` option specifies that the graphics has to be reduced to 40%. The `\includegraphics` command makes use of the graphicx style file, which is a standard LaTeX graphics tool (See example Figure 1).

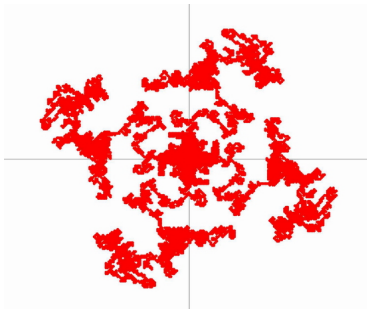

Fig. 1. This is a sample of how to include a eps, jpeg or pdf image in your manuscript.
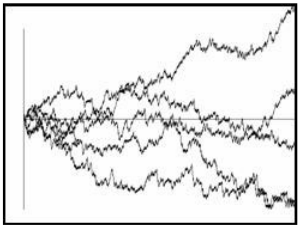

Two Figures can appear as follows:

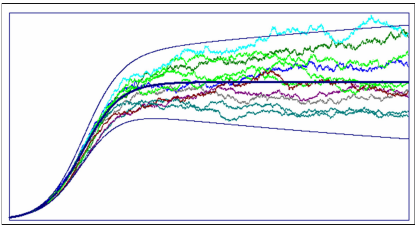

Fig. 2. Caption Text 1   **Fig. 3.** Caption Text 2

Equations should be typed using the LaTeX commands `\begin{equation}` ... `\end{equation}`. For example:

$$g(\mathcal{C}) := \sum_{i=1}^{m} \sum_{k \in C_i} \|x_k - \bar{x}_{C_i}\|^2. \tag{1}$$

If you do not want the equation to be numbered, use `displaymath` instead of `equation`. For example:

$$g(\mathcal{C}) := \sum_{i=1}^{m} \sum_{k \in C_i} \|x_k - \bar{x}_{C_i}\|^2.$$

4   Specifying references

The reference style is presented below. Please use the `\cite` command to refer to other works in your text. For example Saporta[4] for single author. Please note that you need to protect the `\cite` command when used within an `\itemize` environment.

References will appear as follows (Example: Janssen and Skiadas[3]):

- Saporta[4] for single author
- Janssen and Manca[2] in case of two authors
- Skiadas and Skiadas[5] in case of two authors
- D'Amico *et al.*[1] for more than two authors

5   Submission of papers, deadlines

Papers in the form of a ZIP file including the sourse and the pdf files will be submitted to the Conference Secretariat as an E-mail attachment.

For any problem, with the submission procedure, please inform the Conference Secretariat.

6   Camera ready papers, deadlines

Accepted papers will be published in the Conference Proceedings. Please note that at least one author of the paper must be registred for publication in the proceedings.

Final submission will consist of:

- the LaTeX file,
- a `pdf` version of your paper,
- possibly `pdf, jpeg or eps` files for figures, and
- any other file that is necessary to typeset your manuscript in LaTeX.
